

There's a direct correlation between planning and success.

MIPRO's BluePrint Project Services is a strategy and planning workshop designed to help you create a focused implementation or upgrade strategy. Even if you decide to use your own internal resources after the workshop, your chances of running a successful project will be dramatically increased.

The fact is, many enterprise software projects fail because the project team lacks direction and has no clear project map. Others incur serious delays or budget overruns because of scope creep and unanticipated changes. BluePrint will help you develop an implementation/upgrade strategy that maps to your specific business needs and is built upon clear forethought and planning.

What it is:

- A natural starting point for any PeopleSoft or Business Intelligence implementation or upgrade project.
- Affordable, value-rich and flexible.
- One to two-week onsite workshop.
- Facilitated by MIPRO consultants.
- Agnostic to industry or specific application.
- Applicable to any implementation or upgrade involving several applications crossing functional/organizational boundaries.

What it will do:

- Establish project objectives and timeline early.
- Establish assumptions.
- Recognize and mitigate project risks and constraints.
- Foster strong sponsorship of the project by both the project team and senior management.
- Develop a project mindset that encourages team participation, understanding, responsibility and inclusive solutions.

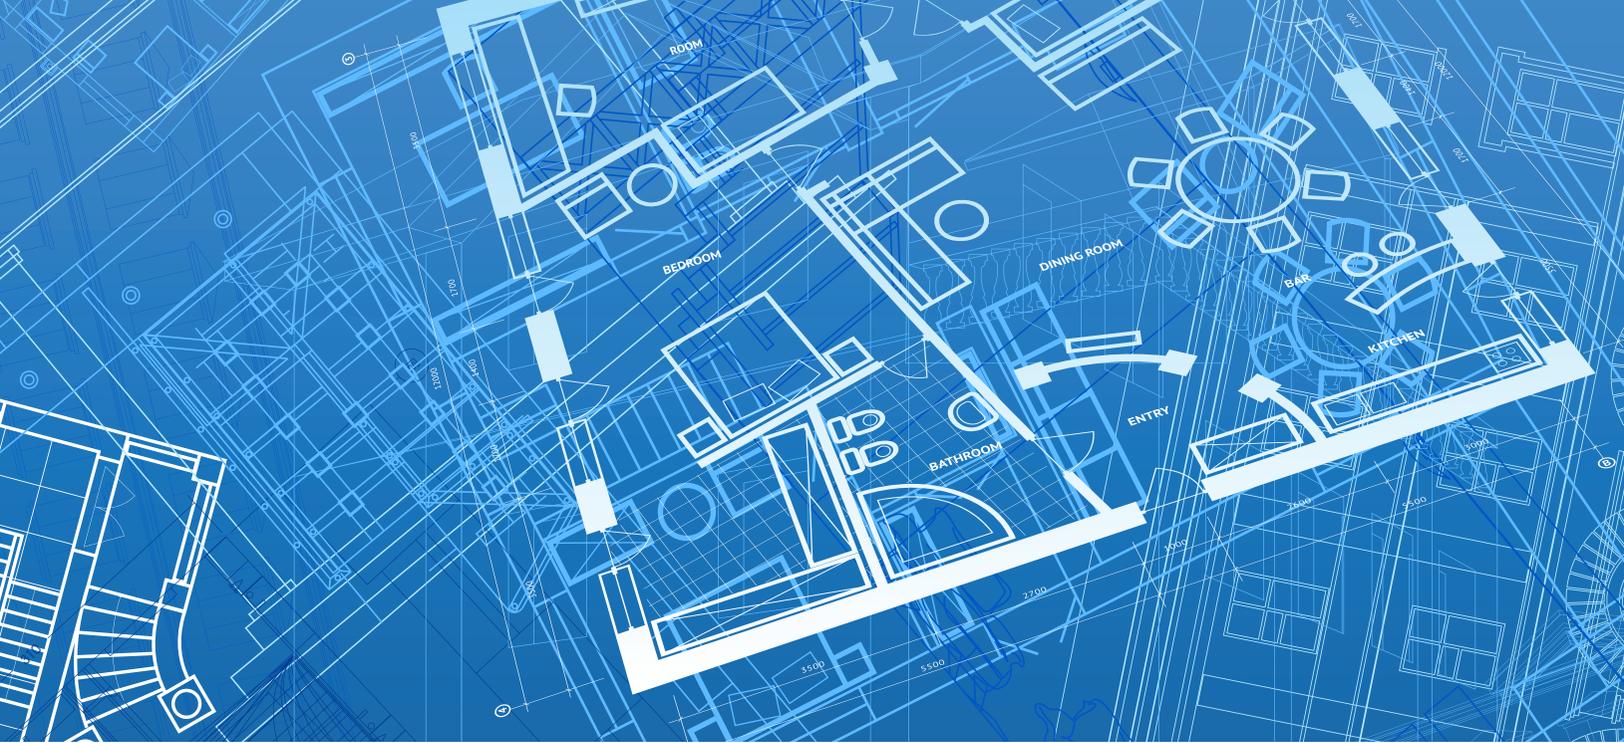

- Encourage senior management participation in critical milestones.
- Develop a process to prevent unplanned scope change threats.
- Clearly define project roles and responsibilities.

Your Project Bedrock

During BluePrint, we'll help you build the cornerstone of your implementation or upgrade: the draft project charter. This draft project charter document is a real deliverable that serves as the early roadmap for your implementation or upgrade. With MIPRO as your facilitator and guide, you'll review broad implementation concepts and project team activities.

You'll explore several discussion areas throughout the course of the BluePrint workshop, including:

- Effect and importance of the project on your business as a whole.
- Your management team's primary objectives and expectations.
- Project planning, scope and constraints.
- Identification of influencing factors on the implementation/upgrade route.
- Project roles and responsibilities.
- Resource estimation.
- Full knowledge transfer: education of project team members and end users.

After Blueprint

Following Blueprint, you'll have a document that provides a thorough framework to support your organization's business objectives in context of your implementation or upgrade project. You can then present Blueprint findings to your key stakeholders. With an extended Blueprint workshop, MIPRO can even help you validate any open issues and develop your management presentation.

Going forward, Blueprint is your roadmap to achieving ongoing optimum outcomes.

MIPRO BLUEPRINT AT A GLANCE

- One- to two-week onsite workshop
- Guided by MIPRO's nationally recognized consultants
- Perfect for implementation or upgrade projects
- Valuable regardless of whether you use internal or external resources for your project
- Fosters teamwork and management sponsorship
- Recognizes and addresses project risk factors up front
- Helps prevent unanticipated project changes

Do the Right Thing

Whatever your challenge, you can count on MIPRO to help you do the right thing. Our passion for our clients' success, employing and inspiring the best people in the business, and the PeopleSoft product conditions our every pursuit. And our laser focus on the PeopleSoft suite ensures that our clients get the exacting precision of a specialist, when a generalist simply won't do.
