

While Fluid is different, it doesn't have to be challenging. Demystify Fluid and introduce it strategically to your organization.

PeopleSoft Fluid is the new direction of PeopleSoft. Eventually it will not be optional. Be prepared for Fluid and strategically deploy it to your organization in a carefully considered and organized manner with MIPRO's Fluid Strategy Services.

What's All This Talk About Fluid

What exactly is Fluid? Will all my PeopleSoft applications eventually be transferred to Fluid? Is Fluid just new screens? How is Fluid development different? How do we start with Fluid? What is currently available with delivered Fluid content?

Fluid Strategy

One of the biggest challenges customers face is understanding what is available with Fluid and how to introduce Fluid to the organization. Fluid does not have to be complex but it does require an appropriate strategy in order to maximize its short-term and long-term potential. We will help you demystify Fluid by executing on these three very important first steps:

1. Developing a specific Fluid Strategy applicable for your organization.
2. Understanding your audience to create a plan specific for your set of users.
3. Creating a reasonable scope that is achievable and provides for appropriate training and change management.

MIPRO can help you incorporate approaches that have worked for other organizations, learn what is available with delivered Fluid, understand how to configure the new Fluid and, ultimately, deploy Fluid in a measured manner.

MIPRO's Fluid Strategy Services

MIPRO's Fluid Strategy is designed to get your organization started and introduce Fluid in a strategic and measured way. Move forward with Fluid so your organization readily adopts Fluid and asks for more. You only have one shot to get it right the first time.

Fluid Strategy Services Overview

- Create an overall Fluid strategy approach
- Design functional documents outlining the Fluid approach
- Design technical documents built from the functional design documents
- Develop in a production-like test or development environment
- Provide support for user testing
- Perform unit testing

Result: A deployed Fluid scope that is specific and manageable for your organization

Engage with professional functional experts that have 20 plus years of PeopleSoft expertise. Interactively develop and approve functional design documents outlining exactly what your Fluid deployment will look like. Transfer those functional design documents into technical design documents with unit testing requirements. Cost effectively develop Fluid offshore but in your production-like development environment. This process enables you to have the confidence to deploy Fluid in a planned, strategic, achievable manner.

MIPRO FLUID STRATEGY SERVICES AT A GLANCE

- Cost effective; scope for under \$20K
- Overall Fluid Strategy
- 20+ years functional expertise
- Interactive functional design documents
- Technical design documents
- Fluid development and unit testing
- Deployment assistance
- Prepare for future Fluid expansion
