

Your institution's maintenance operations won't streamline themselves.

From buildings to diagnostic equipment, from operating rooms to outpatient facilities, your assets represent the largest single investment in the hospital system. Complexity equals cost. So does downtime. Preventive maintenance, work orders, skilled tradesman, and cost capitalization are just a few ingredients in a successful uptime solution. Pulling these elements from multiple systems is not an easy challenge – until now. We all recognize the difficulty of managing from multiple silos of data. Isn't it time for all this to change? It can, with PeopleSoft ALM.

Thought Leaders. Exclusive Experience.

When it comes to PeopleSoft Asset Lifecycle Management (ALM), our experience is unrivaled. Literally.

MIPRO is the only consultancy in the United States that has been involved in the majority of PeopleSoft ALM deployments in North America, and we are now recognized as one of the industry's thought leaders on the technology. It's a leadership position that we take with pride and great responsibility.

We are even universally recognized by Oracle itself as the industry's subject matter expert.

An Idea Whose Time Has Come

PeopleSoft ALM is a robust solution that enables healthcare institutions to prioritize assets and

manage their facilities at the proper levels to meet their goals for utilization and uptime. It's the logical centerpiece to an integrated Facilities solution and is the perfect complement to your PeopleSoft HCM, Financials, and Supply Chain solution.

Like any other software solution that streamlines asset complexity, PeopleSoft ALM requires an intelligent deployment.

What we'll do:

- **Plan** your implementation strategy.
- **Bridge** the communications gap between the various teams/organizations involved in an intelligent ALM deployment.
- **Manage** your implementation from both functional and technical standpoints.
- **Minimize** technical risks by discussing all potential issues, decisions and dependencies.

PeopleSoft ALM and Healthcare

Oracle provides enterprise-strength solutions that help healthcare organizations meet and adapt to the ever-changing needs and demands of all constituents. Oracle solutions improve performance management, reporting, compliance, efficiency, and recruiting results in all areas and levels of healthcare worldwide. Oracle is the leader in providing applications to healthcare institutions, and MIPRO is the leader in ALM implementation.

- 10 of the 10 top hospitals get better results with Oracle
- 10 of the top 12 of Fortune Magazine's Global 500 healthcare organizations run Oracle Applications
- More than 80 healthcare payers run Oracle Applications
- 20 of the top 20 US health insurers run Oracle Applications
