

New lease accounting standards are only a short time away and your organization's leases won't become ASC 842, IFRS 16 or GASB 87 compliant on their own.

PeopleSoft Lease Administration provides lease classification capabilities ensuring compliance with ASC 842, IFRS 16 or GASB 87. This module is fully integrated with the PeopleSoft suite and organizations are using Lease Administration to automate the process of managing leases and underlying assets.

MIPRO's Lease Administration Experience

When it comes to PeopleSoft Lease Administration, our experience is unrivaled. MIPRO has implemented PeopleSoft Lease Administration for business services, fleet, healthcare, retail and hospitality management organizations. Engagement approaches have ranged from providing staff augmentation, in which we leverage our lease administration expertise for organizations with available internal PeopleSoft expertise, to providing a full team with project management from the start to successful deployment.

PeopleSoft Lease Administration

PeopleSoft Lease Administration is fully integrated with Oracle's PeopleSoft Financial Management and Supply Chain Management modules. This ensures that leases are managed according to the terms of your agreements, cost and space utilization are captured for performance management, and your divisions comply with regulatory requirements.

PeopleSoft Lease Administration also leverages Oracle's PeopleSoft Enterprise Human Capital Management solutions for employee and organizational information

used in space management. To further streamline processes and reduce workplace costs, PeopleSoft Lease Administration can be combined with PeopleSoft Maintenance Management for facilities maintenance and with PeopleSoft IT Asset Management for tracking and managing software and hardware.

Lease Administration is asset-reliant and a part of the greater Asset Life Cycle Management (ALM) suite of solutions. An in-depth understanding of the entire asset life cycle, in conjunction with expertise in PeopleSoft's ALM suite, will provide your organization with a total enterprise approach to your needs. As the only consultancy in the United States who has a dedicated PeopleSoft ALM practice, MIPRO has been involved in the majority of PeopleSoft ALM deployments in North America and is recognized as one of the industry's thought leaders in this space.

Like all software solutions that streamline asset complexity, PeopleSoft Lease Administration requires a well-thought-out intelligent deployment approach.

MIPRO's Approach to an Implementation of PeopleSoft Lease Administration

What MIPRO will do:

- Listen and discover. Understand your organizations requirements from budget to skilled staff to deployment constraints and appropriate scope.
- Determine the most appropriate implementation method and how best to leverage MIPRO, whether in a staff augmentation capacity or fully managing your project.
- Provide experts with vast experience and knowledge of PeopleSoft Lease Administration.
- Create a move forward plan to get you on your way with PeopleSoft Lease Administration.

What MIPRO will deliver:

- A recommendation on how best to support your PeopleSoft Lease Administration implementation.
- Implementation timeline with key milestones.
- A resource requirements plan.
- A defined scope encapsulated in a Statement of Work.

PEOPLESOFT LEASE ADMINISTRATION AT A GLANCE

- Compliance with ASC 842, IFRS 16 or GASB 87
- Automation to managing leases and underlying assets.
- An integrated approach tied directly to your PeopleSoft Financials, General Ledger, Asset Management, Accounts Payable and Accounts Receivable systems.
- Eliminates managing redundant setup across multiple systems.
- Allows for real time reporting.
