

Product(s)	Feature	Introduced In Version / Image	Minimum PeopleTools Version
Asset Management	Enhanced the asset data spreadsheet import feature to include approval processing. Unapproved interface lines are not processed by Transaction Loader (AMIF1000).	FSCM 9.2 Update Image 036 (9.2.036).	
Asset Management	Added spreadsheet import templates to support the import asset data by spreadsheet feature. New templates include ChartField Transfers and Cost Adjustment by Amount.	FSCM 9.2 Update Image 037 (9.2.037).	
Billing	Enhanced the Billing Specialist configuration page to include additional data elements such as User ID and Email Address. These additional data elements default on Billing invoices.	FSCM 9.2 Update Image 036 (9.2.036).	
Billing	Enhanced the BI Publisher process to restart and track emails sent.	FSCM 9.2 Update Image 037 (9.2.037).	
Billing	Enhanced Bill entry for India invoices to support the India legislative changes for 2020. Enhancements include the ability to create trading partners, an e-invoice, and a new process that generates inbound and outbound messages. This process (in conjunction with Oracle Consulting service) saves the Invoice Reference Number (IRN) in Billing tables. PeopleSoft Billing generates the file and customers can work with other third party partners for the bi-directional communication with the Invoice Registration Portal (IRP).	FSCM 9.2 Update Image 037 (9.2.037).	
Cash Management	Added the ability to send email notifications for transactions using the Fluid Treasury WorkCenter.	FSCM 9.2 Update Image 037 (9.2.037).	8.55
Contracts	Enhanced My Contracts by adding options to auto-populate a list of contracts for each end user, based on configurable criteria.	FSCM 9.2 Update Image 036 (9.2.036).	8.54
Contracts	Enhanced the Process Contract Billing Run Control Page to include Master Contract Number, LOC Document ID, and a system date processing option.	FSCM 9.2 Update Image 036 (9.2.036).	
Contracts	Enhanced the Contracts Homepage to provide users access to the Manage Contracts tile. This provides a comprehensive view of the Contracts for which users are responsible, and Related Actions to process contract billing and revenue recognition.	FSCM 9.2 Update Image 036 (9.2.036).	8.55
Contracts	Enhanced Customer Contract analytics with Kibana visualization where you can analyze the number, size, and duration of your active contract base.	FSCM 9.2 Update Image 037 (9.2.037).	8.58
Contracts	Added the Run Control Delete Framework in Enterprise Components for FSCM. This framework allows you to delete run control IDs that are no longer used.	FSCM 9.2 Update Image 037 (9.2.037).	8.58
Expenses	Added the Expense Inquiry Chatbot feature. Users can inquire on the status of an expense. Users can send email notifications to approvers if a report has a status of Submitted for Approval or Approvals in Process.	FSCM 9.2 Update Image 036 (9.2.036).	8.57
Expenses	Enhanced the Fluid Expense Report to allow users to copy an entire Expense Report. Users can also copy across multiple Expense Reports by selecting an Expense Type.	FSCM 9.2 Update Image 036 (9.2.036).	8.55
Expenses	Enhanced the Expense Report and Travel Authorization features to use Accounting Tags. Accounting Tags are optional and can be used in place of individual ChartFields on accounting detail pages.	FSCM 9.2 Update Image 037 (9.2.037).	8.55
General FSCM Enhancements	Added the Activity Guide Composer Framework in Enterprise Components, which improves the deployment and management of Fluid Activity Guides by separating the Technical and Functional configuration,	FSCM 9.2 Update Image 036 (9.2.036).	8.55
General FSCM Enhancements	Enhanced the Page and Field Configurator Framework in Enterprise Component to support the masking of prompt lookup fields.	FSCM 9.2 Update Image 036 (9.2.036).	8.57
General FSCM Enhancements	Added the Questionnaire Framework in Enterprise Components to create configurable surveys and questionnaires. The questionnaire setup is delivered as an activity guide.	FSCM 9.2 Update Image 036 (9.2.036).	8.55
General FSCM Enhancements	Added the Run Control Delete Framework in Enterprise Components for FSCM. This framework allows you to delete run control IDs that are no longer used.	FSCM 9.2 Update Image 037 (9.2.037).	8.58
General FSCM Enhancements	Enhanced Financial applications to adhere to the changes in reporting Goods and Services Tax to the GST council. These changes include processing inbound and outbound messages, sending information to the Invoice Registration Portal (IRP), saving the Invoice Reference Number (IRN), and creating and sending an E-Invoice in Billing.	FSCM 9.2 Update Image 037 (9.2.037).	
General FSCM Enhancements	Added Enterprise Component and PeopleTools tile definitions. These tiles provide access to selective configuration pages in PeopleTools and Enterprise Components and can be added to a PeopleSoft Fluid homepage.	FSCM 9.2 Update Image 037 (9.2.037).	8.56
General FSCM Enhancements	Enhanced the Chatbot Integration Framework to support the Twilio channel.	FSCM 9.2 Update Image 037 (9.2.037).	8.57
General Ledger	Enhanced the Year End process to allow you to close, or undo (reopen) a previous close, by individual book code for a year end closing group.	FSCM 9.2 Update Image 036 (9.2.036).	
General Ledger	Added the journal source security feature that restricts access to users based on the permission added to the user or role, for a specific journal source. This feature also restricts posting during period end based on the defined cut-off schedule.	FSCM 9.2 Update Image 037 (9.2.037).	
General Ledger	Enhanced the Federal GTAS and DATA Act functionality to report Disaster Emergency Fund Code information.	FSCM 9.2 Update Image 037 (9.2.037).	
General Ledger	Enhanced the Federal GTAS and DATA Act functionality to report Disaster Emergency Fund Code information.	FSCM 9.2 Update Image 037 (9.2.037).	
General Ledger	Enhanced the Ledger Balances Analysis and Account Reconciliation pivot grids to support PeopleTools Pivot Grid enhancements. The new enhancements on Pivot Grids provides facet order display and all facet values are collapsed when using in Fluid.	FSCM 9.2 Update Image 037 (9.2.037).	

General Ledger	Added Kibana dashboards that help you to analyze financial position and performance as well as gain insights into operational performance.	FSCM 9.2 Update Image 037 (9.2.037).	8.58
General Ledger	Enhanced The Simply Journal Entry feature in Fluid to utilize the new Journal Source Security. The journal source security feature restricts access to users based on the permission added to the user or role, for a specific journal source.	FSCM 9.2 Update Image 037 (9.2.037).	8.55
General Ledger	Added the journal source security feature that restricts access to users based on the permission added to the user or role, for a specific journal source. This feature also restricts posting during period end based on the defined cut-off schedule.	FSCM 9.2 Update Image 037 (9.2.037).	
Global Components	Added the requirements for the U.S. Federal Payment Automation Manager to handle same day automated clearing house payments.	FSCM 9.2 Update Image 036 (9.2.036).	
Grants	Added the Run Control Delete Framework in Enterprise Components for FSCM. This framework allows you to delete run control IDs that are no longer used.	FSCM 9.2 Update Image 037 (9.2.037).	8.58
Maintenance Management	Enhanced Maintenance Management to use Elastic Search. This feature enables keyword search for work orders, and assets by tag, serial, or asset ID. The search includes all business units at the work order header and task levels.	FSCM 9.2 Update Image 036 (9.2.036).	8.55
Maintenance Management	Enhanced Asset Management and Maintenance Management to track the physical life of an asset and determine the life expectancy of equipment.	FSCM 9.2 Update Image 037 (9.2.037).	
Maintenance Management	Enhanced the Work Order to identify on-hand items actuals.	FSCM 9.2 Update Image 037 (9.2.037).	
Payables	Enhanced the Classic Plus Voucher to include Drop Zones. Configurable drop zones allow you to add data elements to delivered fluid pages without customizing the component or fluid page definition.	FSCM 9.2 Update Image 036 (9.2.036).	
Payables	Added the requirements for the US Federal Payment Automation Manager to handle same day automated clearing house payments.	FSCM 9.2 Update Image 036 (9.2.036).	
Payables	COVID-19: Enhanced the capability to process Single Payment Vouchers for Voucher Source XML. ExcelToCI is utilized to bulk load Single Payment Vouchers data in Voucher Staging.	FSCM 9.2 Update Image 036 (9.2.036).	
Payables	Enhanced the Payables and eSettlements pivot grids with three features. Facets are displayed alphabetically. All facets are collapsed when using Fluid. A 1,000 separator added for number fields.	FSCM 9.2 Update Image 036 (9.2.036).	8.55
Payables	Added the Early Detection & Monitoring Kibana visualization for Payables to allow greater visibility into activity as it is processed. Also, provided the capability for Kibana analytics to be accessible using a tile on the Payables Operations Homepage. This tile can access the Kibana Visualizer with full use of PeopleSoft security and navigation.	FSCM 9.2 Update Image 036 (9.2.036).	8.58
Payables	Enhanced PeopleSoft Payables with new reporting data elements that support India's Goods and Services Tax legislative changes for 2020.	FSCM 9.2 Update Image 037 (9.2.037).	
Program Management	Added the Run Control Delete Framework in Enterprise Components for FSCM. This framework allows you to delete run control IDs that are no longer used.	FSCM 9.2 Update Image 037 (9.2.037).	8.58
Project Costing	Enhanced the project template feature to include an option to activate or inactivate a template. When creating a new project from a template, filters are applied to include only the active project templates. Users can inactivate existing templates en masse.	FSCM 9.2 Update Image 037 (9.2.037).	
Project Costing	Enhanced the Project Costing Classic Plus to include Drop Zones. Configurable drop zones allow you to add fields to delivered fluid pages without customizing the component or fluid page definition.	FSCM 9.2 Update Image 037 (9.2.037).	8.58
Project Costing	Added the Run Control Delete Framework in Enterprise Components for FSCM. This framework allows you to delete run control IDs that are no longer used.	FSCM 9.2 Update Image 037 (9.2.037).	8.58
Project Costing	Enhanced the project status feature by providing correction capabilities.	FSCM 9.2 Update Image 037 (9.2.037).	
Receivables	COVID-19: Enhanced the Receivables Credit and Collections feature to allow you to suspend overdue charges for a specified period of time, or suspend any future overdue charges that may arise.	FSCM 9.2 Update Image 036 (9.2.036).	
Receivables	Enhanced the Work Order to identify on-hand items actuals.	FSCM 9.2 Update Image 037 (9.2.037).	
Receivables	Enhanced Receivables pivot grids to support PeopleSoft Fluid Pivot Grid enhancements. Enhancements include displaying facets in alphabetical order and collapsed, and the thousands separator for numerical values.	FSCM 9.2 Update Image 037 (9.2.037).	8.55
Receivables	Enhanced Receivables with new reporting fields that support India's Goods and Services Tax (GST) changes for 2020.	FSCM 9.2 Update Image 037 (9.2.037).	
eBill Payment	Enhanced the Customer Hierarchy feature.	FSCM 9.2 Update Image 037 (9.2.037).	8.55
eSettlements	Enhanced the Fluid Self Service Invoice to include Drop Zones. Configurable drop zones allow you to add fields to delivered fluid pages without customizing the component or fluid page definition.	FSCM 9.2 Update Image 036 (9.2.036).	8.55
Inventory	Enhanced the Putaway Plan report to enable reprint after the Putaway process has been run.	FSCM 9.2 Update Image 036 (9.2.036).	
Inventory	Enhanced the Reservation process to search for one or more substitution items in priority order, when the stock is insufficient to fulfill demand. If there is unfulfilled quantity, a backorder is created based on the reservation rule.	FSCM 9.2 Update Image 037 (9.2.037).	
Inventory	Enhanced the Manual Count process by allowing you to use one of the user-defined fields as selection criteria when creating a Counting Event. Customers still have the option of selecting individual or multiple items by Item Family and Item Group.	FSCM 9.2 Update Image 037 (9.2.037).	
Purchasing	Enhanced SCM and SRM Fluid approvals by enabling the Notification Framework in Enterprise Components.	FSCM 9.2 Update Image 036 (9.2.036).	

Purchasing	Enhanced the Reconcile Statement page to require attachments when spend exceeds the threshold amount set for the Purchasing business unit. Enhanced the Cardholder Profile to streamline the process of adding proxy users by role, and whether the card is inactive. Added the Manage ProCard Expiration component to manage procurement card expiration dates en masse.	FSCM 9.2 Update Image 036 (9.2.036).	
Purchasing	Enhanced the Purchase Order line search results by adding Item and Description fields to the display grid. Enhanced the Voucher Build process by controlling the Voucher Invoice Date for PCard transactions.	FSCM 9.2 Update Image 036 (9.2.036).	
Purchasing	COVID-19: Enhanced the PO Approval process by adding a priority flag to the Purchase Order Header. Approvers can sort and filter Purchase Orders by priority to accelerate the approval time for urgent purchases of goods and services. Also enhanced the online copy functionality and batch sourcing processes to include a priority field from requisitions to purchase orders.	FSCM 9.2 Update Image 036 (9.2.036).	
Purchasing	Enhanced the Federal GTAS and DATA Act functionality to report Disaster Emergency Fund Code information.	FSCM 9.2 Update Image 037 (9.2.037).	
Purchasing	Enhanced Purchase Order approvals to use the Delegation Framework and to delegate authority to other users.	FSCM 9.2 Update Image 037 (9.2.037).	8.55
Purchasing	Enhanced the Purchase Order Acknowledgement process by using the Fluid user interface that combines both Online and EDX purchase order acknowledgements into a single component. Purchase Orders that require attention are automatically displayed, so buyers can efficiently resolve any issues. Modified fields are highlighted to identify the changes.	FSCM 9.2 Update Image 037 (9.2.037).	8.55
Strategic Sourcing	The iLog integration is no longer supported in PeopleSoft Update Image 36.	FSCM 9.2 Update Image 036 (9.2.036).	
Supplier Contract Management	Enhanced Document and Clause approvals to use the Delegation Framework and to delegate authority to other users.	FSCM 9.2 Update Image 037 (9.2.037).	8.55
eProcurement	Enhanced Fluid Requisitions to provide eProcurement users with additional capabilities while creating requisitions. New features include advanced contract search on line details, price adjustment visibility at the schedule level, substitute item visibility on the search row and the line details page, and simplified navigation when searching for keywords across categories.	FSCM 9.2 Update Image 037 (9.2.037).	8.55
eProcurement	Enhanced the eProcurement Receiving feature to allow a casual user to receive all requisitions for all Ship To's based on a new role action.	FSCM 9.2 Update Image 037 (9.2.037).	
eProcurement	Enhanced the eProcurement Receiving feature to allow a casual user to receive all requisitions for all Ship To's based on a new role action.	FSCM 9.2 Update Image 037 (9.2.037).	8.55
eProcurement	Added the Invoice Number field to the Purchase Order Inquiry and Manage Requisition pages.	FSCM 9.2 Update Image 037 (9.2.037).	
eProcurement	Added the Amount Only option on the Special Request and Checkout pages. This raises the visibility of the Amount Only option and allows requesters to set the flag earlier in the requisition process.	FSCM 9.2 Update Image 037 (9.2.037).	8.55
eProcurement	Added the Amount Only option on the Special Request and Checkout pages. This raises the visibility of the Amount Only option and allows requesters to set the flag earlier in the requisition process.	FSCM 9.2 Update Image 037 (9.2.037).
