

Product(s)	Feature	Introduced In Version / Image
Asset Management	Added a WorkCenter exception to identify assets with an inactive location. Users can take action to update the location for one or more assets.	FSCM 9.2 Update Image 049 (9.2.049).
Asset Management	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Asset Management	Enhanced Asset Management to use the import data by spreadsheet process for adjusting accumulated depreciation for assets.	FSCM 9.2 Update Image 050 (9.2.050).
Asset Management	Enhanced the Load Net Book Value Table (AMLDNBVT) process to calculate the remaining life of an asset and store it in the Asset Net Book Value reporting table. This will provide essential data for depreciation queries used in monthly and annual reporting.	FSCM 9.2 Update Image 051 (9.2.051).
Billing	Delivered Notification Composer framework for Billing invoices. PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Billing	Enhanced the Billing Fluid WorkCenter by adding a Letter of Credit Pending Draw link to the My Work section.	FSCM 9.2 Update Image 049 (9.2.049).
Billing	Enhanced the Supporting Documentation page to use the Attachment Framework, which allows one or more attachments to be added at once. The system displays an error message if you try to load more than the number of attachments specified in Installation Options.	FSCM 9.2 Update Image 049 (9.2.049).
Billing	Delivered Notification Composer framework for Credit Invoice approvals. PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Billing	Enhanced the Fluid Billing WorkCenter by adding the My Approvals pagelet. This allows WorkCenter users who are also approvers to access approval options from the WorkCenter.	FSCM 9.2 Update Image 050 (9.2.050).
Billing	Enhanced email options to not send credit invoices to customers. This setting can be set at the business unit and bill type level.	FSCM 9.2 Update Image 050 (9.2.050).
Billing	Enhanced the Mass Update Interface Errors feature by allowing you to perform a mass change when Bill-by fields are missing. Error code 0411 is added to the Mass Update Interface Errors report, which indicates that Bill-by fields are missing. In addition, the Mass Update Interface Errors page is enhanced with a new Error Status option: Missing Bill By Field(s) Value, and Bill-by fields are added in the Error Values section.	FSCM 9.2 Update Image 050 (9.2.050).
Billing	Enhanced the Standard Billing feature to automatically pull address information into the Courtesy Copy Address page. This eliminates the time needed to enter this information manually.	FSCM 9.2 Update Image 051 (9.2.051).
Billing	Enhanced the Billing Spreadsheet to be more user friendly. Navigation buttons are available to quickly navigate to the seven interface tables. In addition, the system remembers what row you are on when adding a new line.	FSCM 9.2 Update Image 051 (9.2.051).
Billing	Enhanced the Billing WorkCenter in Fluid by adding the Insights grouplet. The Insights grouplet includes the Billing Analysis and Billing Operations dashboards.	FSCM 9.2 Update Image 051 (9.2.051).

Commitment Control	Enhanced Commitment Control analytics using PeopleSoft Insights dashboard. The Commitment Control Exceptions Insights dashboard provides a summary of commitment control exceptions based on the Budget Checking (FS_BP) process.	FSCM 9.2 Update Image 049 (9.2.049).
Commitment Control	Added the Commitment Control WorkCenter in Fluid. This WorkCenter includes these pagelets: My Work, My Approvals, Links, Queries, and Reports and Processes.	FSCM 9.2 Update Image 050 (9.2.050).
Commitment Control	Enhanced the Commitment Control WorkCenter in Fluid by adding the Insights grouplet. The Insights grouplet includes the Commitment Control Insights and Commitment Control Exceptions dashboards.	FSCM 9.2 Update Image 051 (9.2.051).
Contracts	Added the Fluid Customer Contracts WorkCenter providing contract administrators actionable My Work exceptions in the areas of contract billing and revenue including plans in pending status, plans on hold, and past due events not yet billed or recognized for revenue. In addition, administrators can replace inactive billing specialists en masse, activate contracts en masse, and fix letter of credit discrepancies to match sponsor funding information.	FSCM 9.2 Update Image 049 (9.2.049).
Contracts	Enhanced the Fluid Contracts WorkCenter to update proposal submission status, generate pre-award projects, and generate awards en masse across the organization.	FSCM 9.2 Update Image 050 (9.2.050).
Expenses	Delivered Notification Composer framework for Travel and Expenses approvals. PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Expenses	Enhanced the personal data record to include Preferred Names and Display Name. which allows your organization to honor employee requests to display and print a preferred name rather than their legal name. The personal data record is accessed from multiple FSCM navigations. Use the Installation Options - Overall page to indicate that you want to use this feature. If PeopleSoft HCM is installed, you must consider the timing of running synchronization processes that updated the personal data record.	FSCM 9.2 Update Image 049 (9.2.049).
Expenses	Enhanced the Create Expense Report page flow for delegates who create expense reports on behalf of another employee. A new selection page is added to the beginning of the process where the delegate must select themselves or another employee before accessing the Expense Report page. This avoids the possibility of creating expense reports for the wrong person.	FSCM 9.2 Update Image 049 (9.2.049).
Expenses	Added six Representational State Transfer (REST) Application Programming Interfaces (APIs) for external consumption. The six are: By Creation Date, By Denied Line, By Last Five, By Sheet Name, By Status, and Transaction Details.	FSCM 9.2 Update Image 049 (9.2.049).
Expenses	Enhanced the Pending Approvals-Expense Report page and the Expense Report-Summary page to display prepaid expense types and denied lines. In addition, the Expense Report includes a Status column. This allows approvers to view more information when approving an expense report and employees to view denied lines.	FSCM 9.2 Update Image 049 (9.2.049).
Expenses	Enhanced multiple setup and transaction pages in Classic and Fluid to verify that the ChartFields used are not defined as Budgetary Only. Expenses includes setup and transactional pages for all expense types. Payables includes the accounting Entry and the Period End Accrual Options.	FSCM 9.2 Update Image 050 (9.2.050).
Expenses	Enhanced Fluid Travel Authorizations to use Public Templates.	FSCM 9.2 Update Image 050 (9.2.050).

Expenses	Enhanced expense reports by allowing authorized users to access a shared corporate credit card charge that is posted in the owner's wallet and transfer the charge into an expense report.	FSCM 9.2 Update Image 050 (9.2.050).
Expenses	Enhanced Fluid Travel Authorizations to use the Quick-Fill option that is available in Classic Travel Authorizations.	FSCM 9.2 Update Image 050 (9.2.050).
Expenses	Converted the Classic Expenses WorkCenter to the Fluid user interface. The Fluid Expenses WorkCenter includes new grouplets for My Approvals in addition to existing grouplets for My Work, Links, Queries, Reports & Processes.	FSCM 9.2 Update Image 051 (9.2.051).
General FSCM Enhancements	Added the ability to include Fluid approvals to Fluid WorkCenters for FSCM.	FSCM 9.2 Update Image 049 (9.2.049).
General FSCM Enhancements	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
General FSCM Enhancements	Provided an enhancement for Products to indicate how many attachments are allowed for each upload task. The message states the number of attachments (as defined in the Installation Options) that can be uploaded in a single upload. Multiple upload actions may be needed to load attachments if there are more than allowed in one task.	FSCM 9.2 Update Image 049 (9.2.049).
General FSCM Enhancements	Enhanced the Activity Guide Composer framework to configure notifications using the Notification Composer framework.	FSCM 9.2 Update Image 049 (9.2.049).
General FSCM Enhancements	Added the capability in Enterprise Components, Forms and Approval Builder to migrate form design data using delivered Application Data Sets.	FSCM 9.2 Update Image 049 (9.2.049).
General FSCM Enhancements	Enhanced the Enterprise Components, Page and Field Configurator to include Search Pages and Prompts. You can modify a label, hide a field, disable entry into a field, make a field required, or have the system automatically default a value into a field.	FSCM 9.2 Update Image 049 (9.2.049).
General FSCM Enhancements	Enhanced the AP installation options to select multiple reporting currencies for transaction amounts in Insights dashboards.	FSCM 9.2 Update Image 050 (9.2.050).
General FSCM Enhancements	Added the Change Tracking Analytics Insights dashboard in Enterprise Components to analyze the history of changes for transactions by product, component, record, field, and user.	FSCM 9.2 Update Image 050 (9.2.050).
General FSCM Enhancements	Added the Insights Catalog navigation collection for FSCM Insights dashboards. Administrators who are granted the EOCL Insights Catalog role can access all Insights dashboards.	FSCM 9.2 Update Image 051 (9.2.051).
General FSCM Enhancements	Enhanced Enterprise Component, Delegation pages to support the PeopleTools Drop Zone functionality.	FSCM 9.2 Update Image 051 (9.2.051).
General FSCM Enhancements	Enhanced the WorkCenter framework in Fluid to add an Insights grouplet to Fluid WorkCenters.	FSCM 9.2 Update Image 051 (9.2.051).
General FSCM Enhancements	Adopted the PeopleTools 8.61 Global Search description feature to be more meaningful to the user. For example, the Global Search description for Installations Options in a PeopleTools 8.60 environment is "Setup Financials/Supply Chain". In a PeopleTools 8.61 environment it displays "Specify installed PeopleSoft products and other installation options."	FSCM 9.2 Update Image 051 (9.2.051).
General Ledger	Delivered Notification Composer framework for Business Process Weaver Process Status-Requester, ChartField Request Error-Requester, Financial Structure Request Completion-Requester, and Financial Structure Request Error-Requester notifications. PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).

General Ledger	Enhanced the Spreadsheet Upload to have the system perform a budget check when loading journals. Also added hover-over text to icons and other cosmetic changes.	FSCM 9.2 Update Image 049 (9.2.049).
General Ledger	Enhanced the Attachment feature to use the Attachment Framework, which allows one or more attachments to be added to Fluid pages. The system displays an error message if you try to load more than the number of attachments specified in Installation Options.	FSCM 9.2 Update Image 049 (9.2.049).
General Ledger	Enhanced the Attachment feature to use the Attachment Framework, which allows one or more attachments to be added to Classic pages. The system displays an error message if you try to load more than the number of attachments specified in Installation Options.	FSCM 9.2 Update Image 049 (9.2.049).
General Ledger	Enhanced the Create/Update Journal Entries page and the Process Request Parameters page to allow you to automatically submit a journal to the approver if the journal passes the edit check.	FSCM 9.2 Update Image 049 (9.2.049).
General Ledger	Enhanced the Create/Update Journal Entries-Approval page so that you can view the approval chain, approval comments, approval history, and denied comments. Denied comments are included in the email that is sent to the user who created the journal.	FSCM 9.2 Update Image 049 (9.2.049).
General Ledger	Delivered Notification Composer framework for these approval notifications: ChartField Request, Financial Structure Request, Reconciliation, Journal Post, and Journal Un-post. PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
General Ledger	Enhanced the Fluid General Ledger WorkCenter by adding the My Approvals pagelet. This allows WorkCenter users who are also approvers to access approval options from the WorkCenter.	FSCM 9.2 Update Image 050 (9.2.050).
General Ledger	Enhanced the Open Period Mass Update page to be able to search and filter by transaction type.	FSCM 9.2 Update Image 050 (9.2.050).
General Ledger	Enhanced the Spreadsheet Journal Import process to run ChartField Security checks. When a journal is imported, the system automatically verifies ChartField Security as a part of the Import process. If journals fail the ChartField Security check, they are not imported. In addition, the status of an imported journal is automatically changed to Ready to Post when the Journal Edit process is completed successfully.	FSCM 9.2 Update Image 051 (9.2.051).
General Ledger	Enhanced the General Ledger WorkCenter by adding Attachment links to multiple fluid pages. This allows you to add and view attachment from the main page without having to drill down.	FSCM 9.2 Update Image 051 (9.2.051).
Grants	Added the Cost Reimbursable Award Insights dashboard. Visualizations provide award and contract administrators comparisons of award cost, budget and billing by award, principal investigator, sponsor, project, contract type, award period, accounting year, and accounting period.	FSCM 9.2 Update Image 049 (9.2.049).
Grants	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Grants	Notifications for award milestones coming due and notifications for changes to proposal status have been migrated to the Notification Composer. Delivered through PeopleSoft Enterprise Components, Notification Composer, provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 051 (9.2.051).

Grants	Enhanced Grants Cost Reimbursable Awards Dashboard to update the terminology from CFDA (Catalog of Federal Domestic Assistance) to ALN (Assistance Listing Number).	FSCM 9.2 Update Image 051 (9.2.051).
Grants	Enhanced Grants pages to update the terminology from CFDA (Catalog of Federal Domestic Assistance) to ALN (Assistance Listing Number). Enhanced the award and proposal to display the prime sponsor when applicable. Enhanced sponsor general information to identify a headquarters location.	FSCM 9.2 Update Image 051 (9.2.051).
Lease Administration	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Lease Administration	Enhanced the lease user interface by adding a link from the asset in Asset Management to the lease in Lease Administration, adding an ending balance column to the payment preview page, and using comma separators for numbers.	FSCM 9.2 Update Image 050 (9.2.050).
Lease Administration	Enhanced Lease Administration by adding Lease Administrator Insights dashboard. This Insights dashboard provides greater visibility into current and future lease payments, lease expirations, lease counts by asset category, and lease option critical dates.	FSCM 9.2 Update Image 050 (9.2.050).
Lease Administration	Enhanced Lease Administration with Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 051 (9.2.051).
Lease Administration	Added Approval Workflow Engine (AWE) processes for Lease Activation and Amendment transactions in Lease Administration. The approvals can be configured to diverse operational structures. The notifications for approvers and requesters will increase operational efficiency and the comprehensive audit trail for each approval will provide clear accountability.	FSCM 9.2 Update Image 051 (9.2.051).
Maintenance Management	Added the option to allow select users to revert work order tasks from 'Complete' to 'Incomplete' status.	FSCM 9.2 Update Image 049 (9.2.049).
Maintenance Management	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Maintenance Management	Enhanced Maintenance Management to add the ability for technicians to mass update the work order status, PCR codes, and date/time-hours worked on multiple work order tasks simultaneously using fluid.	FSCM 9.2 Update Image 050 (9.2.050).
Maintenance Management	Enhanced Mobile Technician-My Tasks to allow authorized technicians to report asset failure events from the asset being worked on. When a preventive maintenance work order fails, technicians can create a corrective maintenance work order. You can create a new work order to schedule and perform the necessary repair work, or add a new corrective task to the same work order that is reporting the failure, or create a service request to investigate and resolve the problem.	FSCM 9.2 Update Image 050 (9.2.050).
Maintenance Management	Enhanced Maintenance Management with Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 051 (9.2.051).

Maintenance Management	Added the ability to automatically inactivate preventive maintenance schedules with the retired assets. This will help maintain data accuracy and reduce user workload.	FSCM 9.2 Update Image 051 (9.2.051).
Maintenance Management	Added the Service Request Inbox to Fluid, which allows the service request agents and technicians to easily search, view, modify, or add service requests through the streamlined user interface.	FSCM 9.2 Update Image 051 (9.2.051).
Payables	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Payables	Enhanced the AP Payment Metrics Insights dashboard to provide additional details. You can also select multiple reporting currencies for transaction amounts.	FSCM 9.2 Update Image 049 (9.2.049).
Payables	Added the option for approvers to view the invoice image during the approval process if imaging integration is setup.	FSCM 9.2 Update Image 049 (9.2.049).
Payables	Added support for G-Invoicing 7600EZ for direct invoices that are \$10,000 or less.	FSCM 9.2 Update Image 049 (9.2.049).
Payables	Added grid personalization for Payables fluid pages in PeopleTools 8.60.	FSCM 9.2 Update Image 049 (9.2.049).
Payables	Added My Approvals grouplet to the WorkCenter framework to enable approvals in a Fluid WorkCenter.	FSCM 9.2 Update Image 049 (9.2.049).
Payables	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Payables	Enhanced the Fluid Accounts Payable WorkCenter by adding the My Approvals pagelet. This allows WorkCenter users who are also approvers to access approval options from the WorkCenter.	FSCM 9.2 Update Image 050 (9.2.050).
Payables	Enhanced the Classic attachment framework to allow users to select multiple attachments and upload them at once. The system displays an error message if you try to load more number of attachments than the number specified in Installation Options.	FSCM 9.2 Update Image 050 (9.2.050).
Payables	Enhanced the Fluid attachment framework to allow users to select multiple attachments and upload them at once. The system displays an error message if you try to load more number of attachments than the number specified in Installation Options.	FSCM 9.2 Update Image 050 (9.2.050).
Payables	Added common framework to select multiple reporting currencies for transaction amounts in Insights dashboards.	FSCM 9.2 Update Image 050 (9.2.050).
Payables	Enhanced Fluid Payment Request template to include new fields like Handling Code, Payment Message, and Separate Payment. Requesters can now update payment requests until the transaction has been fully approved. Also, payment request allows payment of single pay vouchers using checks as the payment method.	FSCM 9.2 Update Image 050 (9.2.050).
Payables	Enhanced supplier portal security by sending an access code to the primary email id and validating it to proceed.	FSCM 9.2 Update Image 051 (9.2.051).
Payables	Added option to view remit supplier information on the voucher approval page.	FSCM 9.2 Update Image 051 (9.2.051).
Payables	Enhanced voucher upload process by including additional fields on voucher upload spreadsheet, saving login information, improving error messaging, and additional field validation.	FSCM 9.2 Update Image 051 (9.2.051).
Payables	Enhanced Match Exceptions by adding Requestor as an auto assignment option. Also, Buyer field included on the Filter options of the Match Exception Collaboration Summary page.	FSCM 9.2 Update Image 051 (9.2.051).

Payables	Enhanced the Accounts Payables WorkCenter in Fluid by adding the Insights grouplet. The Insights grouplet includes the AP Payment Metrics, Early Detection and Monitoring, and Trend Analysis dashboards.	FSCM 9.2 Update Image 051 (9.2.051).
Payables	Added an option on Voucher entry page to copy distributions from the related voucher while creating the Journal Voucher so that the user does not have to manually enter distributions.	FSCM 9.2 Update Image 051 (9.2.051).
Program Management	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Project Costing	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Project Costing	Added a new configuration page to identify the types of transactions to exclude from integrations with Expenses, General Ledger, and Payables.	FSCM 9.2 Update Image 050 (9.2.050).
Project Costing	Delivered the My Work Exception in fluid to allow a projects superuser to review projects ready for compression and run the process.	FSCM 9.2 Update Image 050 (9.2.050).
Project Costing	Enhanced the budget copy capability to allow copying a project budget from an existing project to a new project.	FSCM 9.2 Update Image 050 (9.2.050).
Project Costing	Added a process to update year, period and journal date in Project Costing to match that used in General Ledger, which applies to transactions sent from Project Costing to General Ledger. This streamlines the monthly reconciliation of transactional data across the Project Costing and General Ledger applications.	FSCM 9.2 Update Image 051 (9.2.051).
Project Costing	Enhanced Project Costing with Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 051 (9.2.051).
Receivables	Added the ability to configure the Send From email address when the feature is enabled at Installation options for Receivables.	FSCM 9.2 Update Image 049 (9.2.049).
Receivables	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Receivables	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Receivables	Enhanced the attachment framework to allow users to select multiple attachments and upload them at once. The system displays an error message if you try to load more number of attachments than the number specified in Installation Options.	FSCM 9.2 Update Image 049 (9.2.049).
Receivables	Added the ability to enter AR direct journals using Microsoft Excel spreadsheet upload.	FSCM 9.2 Update Image 049 (9.2.049).
Receivables	Enhanced the Fluid Receivables WorkCenter by adding the My Approvals pagelet. This allows WorkCenter users who are also approvers to access approval options from the WorkCenter.	FSCM 9.2 Update Image 050 (9.2.050).
Receivables	Enhanced Maintenance Worksheet to display additional refund information. This improves the AR to AP integration for customer refunds.	FSCM 9.2 Update Image 050 (9.2.050).

Receivables	Enhanced Excel Error Correction component to allow editing of the Direct Journal accounting line errors.	FSCM 9.2 Update Image 050 (9.2.050).
Receivables	Added the option to enter an accounting tag on AR accounting lines to pull in a pre-defined set of ChartFields similar to Speed Types. Accounting tags will be available on online pending item entry, direct journals and worksheets including payment, credit card, maintenance, and transfer.	FSCM 9.2 Update Image 051 (9.2.051).
Receivables	Enhanced Collections Workbench to include Direct Journal Payments as a new tab on the workbench when Track Direct Journal Customer option is selected at installation level.	FSCM 9.2 Update Image 051 (9.2.051).
Receivables	Added the option to indicate whether a maintenance worksheet is generated by auto-maintenance or online, identify the method used to create maintenance worksheet and the algorithm group used by the auto-maintenance process.	FSCM 9.2 Update Image 051 (9.2.051).
Resource Management	Enhanced the personal data record to include Preferred Names and Display Name. Which allows your organization to honor employee requests to display and print a preferred name rather than their legal name. The personal data record is accessed from multiple FSCM navigations. Use the Installation Options - Overall page to indicate that you want to use this feature. If PeopleSoft HCM is installed, you must consider the timing of running synchronization processes that updated the personal data record.	FSCM 9.2 Update Image 049 (9.2.049).
Resource Management	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Resource Management	Added Drop Zones to Assign Resource and Resource Requests Classic pages in Resource Management. Drop Zones provide an area on a page that you can use to map organization-valued entries.	FSCM 9.2 Update Image 051 (9.2.051).
Treasury	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Treasury	Enhanced NACHA data security feature to provide customers the capability to easily adopt a new encryption profile.	FSCM 9.2 Update Image 049 (9.2.049).
Treasury	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Treasury	Enhanced the attachment framework to allow users to select multiple attachments and upload them at once in Fluid. The system displays an error message if you try to load more number of attachments than the number specified in Installation Options.	FSCM 9.2 Update Image 049 (9.2.049).
Treasury	Enhanced the attachment framework to allow users to select multiple attachments and upload them at once in Classic. The system displays an error message if you try to load more number of attachments than the number specified in Installation Options.	FSCM 9.2 Update Image 049 (9.2.049).
Treasury	Enhanced the Fluid Treasury WorkCenter by adding the My Approvals pagelet. This allows WorkCenter users who are also approvers to access approval options from the WorkCenter.	FSCM 9.2 Update Image 050 (9.2.050).
Treasury	Added support for upgrade to ISO 20022 version 2019 for payment messages.	FSCM 9.2 Update Image 050 (9.2.050).

eBill Payment	Added the My Preferences tile for self-service users to quickly access their eBill Payment preferences.	FSCM 9.2 Update Image 049 (9.2.049).
eSettlements	Enhanced eSettlements skill in Supplier Digital Assistant by replacing HTML tags with resource bundle. This is a new requirement for Oracle Digital Assistant (ODA).	FSCM 9.2 Update Image 049 (9.2.049).
Inventory	Enhanced Inventory Express Issue and related pages to add header and line comments and attachments.	FSCM 9.2 Update Image 049 (9.2.049).
Inventory	Enhanced Inventory Product to add Lot Expiration Date field to the Advanced Shipping Notice transaction in EDI and XML modes.	FSCM 9.2 Update Image 051 (9.2.051).
Inventory	Enhanced Inventory product, Manage Replenishment Requests component to display the additional fields based on the configuration on the Setup Item Replenishment and Setup Replenishment Page.	FSCM 9.2 Update Image 051 (9.2.051).
Mobile Inventory Management	Enhanced Mobile Inventory Express Issue to add header and line comments and attachments.	FSCM 9.2 Update Image 049 (9.2.049).
Mobile Inventory Management	Enhanced Mobile Inventory, delivery transaction with comments and attachments functionality. Users can also search the delivery documents in mobile inventory.	FSCM 9.2 Update Image 050 (9.2.050).
Purchasing	Enhanced Purchasing and Payables for the U.S. Department of Treasury G-Invoicing system with additional capabilities to support the new functionality called 7600EZ for direct invoices that are \$10,000 or less.	FSCM 9.2 Update Image 049 (9.2.049).
Purchasing	Enhanced Procurement Card pages and reports to always display the employee legal name. This is in response to a new feature where administrators can enter a Preferred Name and a Display Name for employees.	FSCM 9.2 Update Image 049 (9.2.049).
Purchasing	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Purchasing	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Purchasing	Added the Supplier Activity Analytics Insights dashboard to analyze the performance of suppliers based on quality, delivery performance, pricing, and POA responsiveness.	FSCM 9.2 Update Image 049 (9.2.049).
Purchasing	Enhanced Supplier Request System Setup to enable Reason Code for withdrawing Supplier/Bidder Registration and Change Request. Also, additional statuses are added to the status search criteria on the Manage Obsolete Requests page to filter the Supplier/Bidder Registrations and Change Requests.	FSCM 9.2 Update Image 049 (9.2.049).
Purchasing	Enhanced Purchasing receipts to add or remove the comments and attachments for the selected line item.	FSCM 9.2 Update Image 050 (9.2.050).
Purchasing	Enhanced Purchase Order to send the PO dispatch email from buyer, system, or specific email id. You can also include or exclude buyers from the PO dispatch email.	FSCM 9.2 Update Image 051 (9.2.051).
Purchasing	Enhanced Supplier Relationship Management to increase supplier portal security by sending an access code to the primary email id and validating it to proceed.	FSCM 9.2 Update Image 051 (9.2.051).
Purchasing	Enhanced Purchasing to import Procurement Contracts using Delimited File Layout and Fixed File Layout. Also enhanced Maintain Imported Contracts to update the new and existing contracts information.	FSCM 9.2 Update Image 051 (9.2.051).

Purchasing	Added the ability to turn off Real Time Indexing (RTI) when certain high volume batch jobs that update Procurement Contracts and Purchasing Effectiveness insights. When RTI is disabled, it is recommended that incremental indexing for these insights be run, which will automatically enable RTI again when finished.	FSCM 9.2 Update Image 051 (9.2.051).
Strategic Sourcing	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Strategic Sourcing	Enhanced Strategic Sourcing to add primary email ID to the bidder profile and when the bidder is converted to supplier, the same primary email id is used to send the access code for validation.	FSCM 9.2 Update Image 051 (9.2.051).
Supplier Contract Management	PeopleSoft Enterprise Components delivers Notification Composer, which provides a centralized framework to create and manage all your notifications within PeopleSoft applications. Notification Composer streamlines multiple notification methods and frameworks into a single approach.	FSCM 9.2 Update Image 049 (9.2.049).
Supplier Contract Management	Enhanced selected functions within Supplier Contract Management to enable the selection and uploading of multiple attachments based upon the max files upload setting in FSCM Installation Options.	FSCM 9.2 Update Image 049 (9.2.049).
Supplier Contract Management	Added the ability to reuse canceled amendment sequence numbers for future amendments to match the audit control requirements.	FSCM 9.2 Update Image 051 (9.2.051).
Supplier Relationship Management	Enhanced the Comprehensive Supplier Secure Portal to adopt a Fluid user interface that supports Line Bid Groups, RFI, and Auction capabilities for Bidder Response.	FSCM 9.2 Update Image 050 (9.2.050).
Supplier Relationship Management	Enhanced Supplier Change request to define any field of the train stop as Personal Identifier (PII), Sensitive, or both. The approver also receives an alert message to review these on the Review page before approving the Change Request.	FSCM 9.2 Update Image 050 (9.2.050).
Supplier Relationship Management	Enhanced Supplier Relationship Management to enable OFAC checks for the Supplier and Supplier Change Request. If the Supplier name and address are listed on the financial sanctions report, the approver receives an alert message to review and validate the Supplier as eligible for payment before approving the Supplier or Change Request.	FSCM 9.2 Update Image 050 (9.2.050).
eProcurement	Added the ability to designate Amount Only by item category using a new tile on the eProcurement fluid home page. Based on this designation, the Amount Only flag is defaulted on the Special Requests, Fixed Cost Service, Variable Cost Service, and Time and Materials pages.	FSCM 9.2 Update Image 049 (9.2.049).
eProcurement	Added Requester Mass Change to the eProcurement fluid home page. Use this feature to replace the original requester of the selected requisitions with a new requester. The new requester gets future notifications and can receive the requisitions entered by the original requester.	FSCM 9.2 Update Image 049 (9.2.049).
eProcurement	Enhanced eProcurement Requisition Inquiry Skill by removing HTML tags from web services.	FSCM 9.2 Update Image 049 (9.2.049).
