

Product(s)	Feature	Introduced In Version / Image
Asset Management	Enhanced Depreciation Reporting table load process by adding a seven year depreciation forecast report. This will make reporting more efficient for customers with large volumes of assets.	FSCM 9.2 Update Image 054 (9.2.054).
Asset Management	Enhanced Asset Management by expanding the InterUnit Transfer Spreadsheet Upload to include ChartFields and location code changes. This update will boost efficiency by eliminating the need for additional transactions after completing an interunit transfer.	FSCM 9.2 Update Image 054 (9.2.054).
Asset Management	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Asset Management	Enhanced the Asset Tracking feature to include printing and scanning of location codes associated with specific business units, while maintaining backward compatibility with previous scanning methodologies.	FSCM 9.2 Update Image 055 (9.2.055).
Asset Management	As of FSCM Update Image 55, Asset Management no longer supports the integration with ESRI ARCGIS (geographic information system).	FSCM 9.2 Update Image 055 (9.2.055).
Asset Management	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_AM_ASSET search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Asset Management	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Asset Management delivers Asset Tracking section, where you can select tiles to access transaction pages.	FSCM 9.2 Update Image 055 (9.2.055).
Billing	Enhanced the Build Search Index process for Billing by allowing you to run the index by data partition for the EP_BI_BILLING and EP_BI_HDR_KIB search definitions. This optional method allows data to be processed in chunks using one or more run controls to index the data more efficiently.	FSCM 9.2 Update Image 054 (9.2.054).
Billing	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Billing	Enhanced the Billing WorkCenter in Fluid by adopting the Enterprise Components, Work Management Framework. This framework allows you to view and manage transactions when they appear in the My Work section of the Billing WorkCenter. This optional framework provides additional actions, in addition to existing application-delivered actions, to track and clear transactions when no system-based resolution exists. The transactions are placed into one of five different views: Unassigned, All Assigned, All History, Assigned to Me, and Inactive.	FSCM 9.2 Update Image 054 (9.2.054).
Billing	Enhanced the Spreadsheet Import to Billing Interface process to work with OneDrive and simplified the distribution of new workbook versions. Log files are now written to the same workbook file in the new Import Logs tab. The Import Logs tab displays the status and log message. This feature streamlines the import process, improves user experience, and eliminates unnecessary steps.	FSCM 9.2 Update Image 054 (9.2.054).
Billing	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_BI_BILLING and EP_BI_HDR_KIB search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
Billing	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Receivables delivers a Billing and Receivables section, where you can select tiles to access transaction pages.	FSCM 9.2 Update Image 055 (9.2.055).
Billing	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Billing delivers the Billing Worksheets Pending Approval tile in the Suggestions section. This tile allows you to access the View All page, which displays temporary invoices that originate from Contracts and are not pre-approved. You can dismiss the transaction or access the Update Billing Worksheet, Worksheet Headers page where you can manage and approve the temporary invoice.	FSCM 9.2 Update Image 055 (9.2.055).
Billing	Enhanced the Billing Interface process by adding a check box to the Bill By Identifier page. This check box provides administrators with the flexibility to configure which fields are required and validated, ensuring the success of the Billing Interface process.	FSCM 9.2 Update Image 055 (9.2.055).
Cash Management	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Treasury delivers a Cash Management section, where you can select Bank Balances, Bank Transfer Center and, Invest and Debt tiles to access transaction pages.	FSCM 9.2 Update Image 055 (9.2.055).

Cash Management	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Cash Management delivers the Financial Gateway Transactions on Hold and Financial Gateway Transactions awaiting Dispatch tiles in the Suggestions section.	FSCM 9.2 Update Image 055 (9.2.055).
Contracts	As of FSCM Update Image 54, Contracts modified the default setting in Application Designer for various pushbuttons and hyperlinks to be Enabled when the page is read-only for the user. This impacts these components in Contracts. Define Contract General Info, Define Billing Plan, Define Revenue Plan, Special Payment Terms, Contract Terms, Prepaid Balances, Transaction Limits, My Contracts, and My Contracts Criteria.	FSCM 9.2 Update Image 054 (9.2.054).
Contracts	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Contracts	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Contracts	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_CA_HDR_KIB search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Contracts	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_CA_CONTRACTS search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Contracts	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Contracts delivers Customer Contracts section, where you can select tiles to access transaction pages.	FSCM 9.2 Update Image 055 (9.2.055).
Contracts	As of FSCM Update Image 55, Contracts no longer supports Classic Contracts WorkCenter.	FSCM 9.2 Update Image 055 (9.2.055).
Expenses	Enhanced the Expenses Admin View page to allow administrators to deny approved expense reports and to send approved expense reports back to the requester.	FSCM 9.2 Update Image 054 (9.2.054).
Expenses	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Expenses	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Expenses	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Expenses	Enhanced the Travel Authorization creation process for proxy (delegate) users to prevent proxy users from selecting the wrong employee. The system now displays an Employee Search page when creating a travel authorization, similar to the expense report process that was changed in Update Image 49. This is an optional feature that requires you to define authorized users.	FSCM 9.2 Update Image 054 (9.2.054).

Expenses	Enhanced credit card encryption by allowing you to select from multiple encryption algorithms, which are initially loaded using the Encryption Profile page in PeopleTools. The FSCM Manage Credit Card Encryption page is modified to select a new encryption profile from your list, which updates the algorithm for all FSCM records.	FSCM 9.2 Update Image 054 (9.2.054).
Expenses	As of FSCM Update Image 55, Expenses no longer supports integration with Primavera.	FSCM 9.2 Update Image 055 (9.2.055).
Expenses	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_EX_REPORT search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Expenses	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_EX_SRCH_CA_OVERDUE_WC_INSGT, EP_EX_SRCH_NON_REIMBEXP_WC_INSGTM, EP_EX_SRCH_ONHOLD_PEND_WC_INSGT, and EP_EX_SRCH_OTRANS_INEMP_WC_INSGT search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
Expenses	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Expenses delivers the Submit Your Wallet Charges tile in Suggestions section. This tile allows you to access the Wallet Entry page to address unsubmitted Wallet entries.	FSCM 9.2 Update Image 055 (9.2.055).
Expenses	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Expenses delivers a link to Expenses WorkCenter in the My Work section.	FSCM 9.2 Update Image 055 (9.2.055).
Expenses	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Expenses delivers an enhanced Travel & Expenses dashboard in the Quick Access section.	FSCM 9.2 Update Image 055 (9.2.055).
Expenses	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Expenses delivers the Pending Expense Reports and the Pending Travel Authorizations tiles in the Continue With section.	FSCM 9.2 Update Image 055 (9.2.055).
Expenses	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_EX_SRCH_EMP_EXCP_KIB, EP_EX_SRCH_PERF_OPR_KIB, and EP_EX_SRCH_RISK_EXCP_KIB search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
Expenses	Enhanced the My Proxy Insight dashboard by adding two visualizations and a data grid for Travel Authorizations. The Travel Authorization by Status visualization can be used to monitor travel authorization workflows, identify delays, and make informed decisions regarding approvals and follow-ups. The Travel Authorization Denied by Expense Type can be used to view denied travel authorizations by expense type.	FSCM 9.2 Update Image 055 (9.2.055).
General FSCM Enhancements	Added a Payment Justification field to the Accounts Payable voucher. The field is available for all voucher styles regardless of the payment type and EFT layout code.	FSCM 9.2 Update Image 054 (9.2.054).
General FSCM Enhancements	PeopleSoft delivers Fluid WorkCenters via IADS projects. The IADS projects are not available as part of a change package. All IADS project names and configuration IDs are listed in PeopleSoft documentation and can be found using the Data Migration Workbench search page. Step-by-step instructions are available on My Oracle Support (MOS) Document ID 3111467.1.	FSCM 9.2 Update Image 055 (9.2.055).
General FSCM Enhancements	Enhanced the Activity Guide Composer template with a new Move Actions button, enabling administrators to reorganize steps efficiently in complex templates with numerous steps.	FSCM 9.2 Update Image 055 (9.2.055).
General FSCM Enhancements	FSCM jQuery has been upgraded to version 3.7.1.	FSCM 9.2 Update Image 055 (9.2.055).
General FSCM Enhancements	Enhanced the Enterprise Components WorkCenter framework to enable insights dashboards to be embedded within My Work links in Fluid WorkCenters. This allows for direct and visual interaction with data on linked pages. Dashboard filters are automatically applied to the My Work grid, providing administrators with the latest transaction data based on dashboard interactions.	FSCM 9.2 Update Image 055 (9.2.055).
General FSCM Enhancements	Added the ability to enable Real Time Indexing (RTI) for Page and Field Configurator Change Tracking insights, allowing for near real-time updates to indexed data using PeopleTools search technology. This enhancement requires PeopleTools 8.62.	FSCM 9.2 Update Image 055 (9.2.055).
General FSCM Enhancements	Added Notification Publisher in Enterprise Components to enable publishing of one-time or recurring notifications in PeopleSoft. This feature supports notifications for landing page sections such as Banner Announcement and Announcements. Message content can be sourced from Notification Composer and overridden as needed. Additionally, Notification Publisher supports notifications with expiration dates, future posting dates, attachments, and more.	FSCM 9.2 Update Image 055 (9.2.055).
General FSCM Enhancements	Adopted the PeopleTools 8.62 feature for Sectionalized Homepages. This feature allows you to configure individualized landing pages that include sections for an enhanced user experience. FSCM has delivered sample Homepages, also known as landing pages, that can be copied and modified for your use.	FSCM 9.2 Update Image 055 (9.2.055).
General FSCM Enhancements	Enhanced Page and Field Configurator to override application default values with a value that is determined on the Page Configuration page.	FSCM 9.2 Update Image 055 (9.2.055).

General Ledger	Enhanced the General Ledger WorkCenter in Fluid by adopting the Enterprise Components, Work Management Framework. This framework allows you to view and manage transactions when they appear in the My Work section of the General Ledger WorkCenter. This optional framework provides additional actions, in addition to existing application-delivered actions, to track and clear transactions when no system-based resolution exists. The transactions are placed into one of five different views: Unassigned, All Assigned, All History, Assigned to Me, and Inactive.	FSCM 9.2 Update Image 054 (9.2.054).
General Ledger	Added the LASTUPDDTTM (last update date and time) field to the DEPT_TBL (department table). This field is now updated whenever there is any change in the department data.	FSCM 9.2 Update Image 054 (9.2.054).
General Ledger	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
General Ledger	Enhanced the Journal Upload workbook to consolidate all required Excel files into one. Excel Macros from the JRNLMCRO_WS workbook and the JrnlLog file are now combined into the JRNL1_WS workbook. The new Import Logs tab displays the status and log message. This features allows the journal upload to work with OneDrive and simplifies the distribution of new workbook versions.	FSCM 9.2 Update Image 054 (9.2.054).
General Ledger	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. General Ledger delivers the Journals in Error and Review Financial Structure Requests tiles in the Suggestions section.	FSCM 9.2 Update Image 055 (9.2.055).
General Ledger	Enhanced the General Ledger WorkCenter by adding the ability to display Insights above the Journals Ready For Post grid in the My Work section.	FSCM 9.2 Update Image 055 (9.2.055).
General Ledger	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_GL_JOURNAL, EP_GL_JOURNAL_KIB, and EP_GL_KK_ACTIVITY_LOG_KIB search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
General Ledger	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. General Ledger delivers the Incomplete Journals and Complete Financial Structure Request tiles in the Continue With section.	FSCM 9.2 Update Image 055 (9.2.055).
General Ledger	Enhanced the Application Engine (GL_YC) that is used to close ledgers to recognize the Do Not Roll Forward Zero Balances check box, which is determined on the Closing Rules - Roll-Forward Options Page.	FSCM 9.2 Update Image 055 (9.2.055).
General Ledger	Enhanced nVision drilldown layouts to improve formatting and added fields for drilled from information.	FSCM 9.2 Update Image 055 (9.2.055).
General Ledger	Enhanced Journal Entry templates and the Journal Entry Lines page by adding the option to display a long description field and up to five reference fields. The long description field allows up to 254 characters, improving clarity and context for journal entries. The reference fields allow you to include supplementary information or references, such as document numbers or codes, enhancing traceability and organization.	FSCM 9.2 Update Image 055 (9.2.055).
General Ledger	Enhanced the Create/Update Journal Entries page where you can add, update, or delete comments associated with a journal entry. The system retains comment history for the journal and allows you to manage comments throughout the journal lifecycle, including posted or unposted journals. Journal comments are not copied to any other journal created from the original.	FSCM 9.2 Update Image 055 (9.2.055).
General Ledger	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. General Ledger delivers a Finance and Accounting section, where you can select tiles to access transaction pages.	FSCM 9.2 Update Image 055 (9.2.055).
Grants	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Grants	As of FSCM Update Image 54, Grants modified the default setting in Application Designer for various pushbuttons and hyperlinks to be Enabled when the page is read-only for the user. This impacts these components in Grants. Award Profile, Establish Project General Info, Maintain Award Attachments, Review Award Modifications, Update Project Activity, Institution General, Institution Certs and Compliance, Professional Name and Address, and Enter Proposal Budget Detail.	FSCM 9.2 Update Image 054 (9.2.054).
Grants	As of FSCM Update Image 55, Grants no longer supports Classic Grants WorkCenter.	FSCM 9.2 Update Image 055 (9.2.055).

Grants	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_GM_AWARDS search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Grants	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Grants delivers Grants Management section, where you can select tiles to access transaction pages.	FSCM 9.2 Update Image 055 (9.2.055).
Grants	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_GM_AWD_INS, EP_GM_AWD_MILE_INS, EP_GM_AWD_MOD_INS, and EP_GM_PROPOSAL_INS search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
Lease Administration	Added the Lease Administration Fluid WorkCenter, empowering Lease Administrators to efficiently view and manage leased assets and handle processing exceptions. Additionally, users will have quick access to their most used transactions, reports, and processes.	FSCM 9.2 Update Image 054 (9.2.054).
Lease Administration	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Lease Administration	Enhanced Lease Administration WorkCenter in Fluid by adopting the Enterprise Components, Work Management Framework. This framework allows you to view and manage transactions when they appear in the My Work section of the LA WorkCenter. This optional framework provides additional actions, in addition to existing application-delivered actions, to track and clear transactions when no system-based resolution exists. The transactions are placed into one of five different views: Unassigned, All Assigned, All History, Assigned to Me, and Inactive.	FSCM 9.2 Update Image 054 (9.2.054).
Lease Administration	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_RE_PAYMENT_INS, EP_RE_OPTIONS_INS, and EP_RE_ASSET_INS search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
Maintenance Management	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Maintenance Management	Enhanced Maintenance Management by adding a link on the My Task Work Order page to directly access attachments from the asset's General Information page.	FSCM 9.2 Update Image 054 (9.2.054).
Maintenance Management	As of FSCM Update Image 55, Maintenance Management no longer supports the integration with ESRI ARCGIS (geographic information system).	FSCM 9.2 Update Image 055 (9.2.055).
Maintenance Management	Enhanced the Work Order copy functionality by adding the ability to copy a work order to a different business unit. User can select resource content to be copied and make adjustments to modify the work order for the actual work to be performed in the new business unit.	FSCM 9.2 Update Image 055 (9.2.055).
Maintenance Management	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Maintenance Management delivers Mobile Technician section, where you can select tiles to access transaction pages.	FSCM 9.2 Update Image 055 (9.2.055).
Maintenance Management	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_WM_SRCH_WORK_ORDERS and EP_WM_SRCH_WO_ASSETS search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
Payables	Added Insights Dashboard that highlights match exceptions by Voucher as well as match exceptions if using the Match Exception Collaboration Center functionality.	FSCM 9.2 Update Image 054 (9.2.054).
Payables	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Payables	Added a Payment Justification field to the Accounts Payable voucher. The field is available for all voucher styles regardless of the payment type and EFT layout code.	FSCM 9.2 Update Image 054 (9.2.054).
Payables	Added the option to utilize pressure seal 1099 forms generated from PeopleSoft Payables.	FSCM 9.2 Update Image 054 (9.2.054).

Payables	Enhanced the spreadsheet voucher process when generating log files. Log files are now written to the same workbook file in a new tab. The vchrlog tab displays the status and log message.	FSCM 9.2 Update Image 054 (9.2.054).
Payables	Added fluid approval workflow for Pay Cycles.	FSCM 9.2 Update Image 054 (9.2.054).
Payables	Added Insights Dashboard that highlights match exceptions by Voucher as well as match exceptions if using the Match Exception Collaboration Center functionality. The dashboard is available in the Insights Catalog with PeopleTools 8.61 or higher.	FSCM 9.2 Update Image 054 (9.2.054).
Payables	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_AP_PAYMENTS, EP_AP_PAYMENTS_KIB, EP_AP_VENDOR, EP_AP_VOUCHERS, EP_AP_MTCHEX_MECC_OSD and EP_AP_MTCHEX_VCHR_OSD search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
Payables	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Account Payables delivers the Match Exceptions and Payments on Hold tiles in the Suggestions section.	FSCM 9.2 Update Image 055 (9.2.055).
Payables	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Account Payables delivers the Incomplete Vouchers and Payment Request tiles in the Continue With section.	FSCM 9.2 Update Image 055 (9.2.055).
Payables	Added option to default the specified Bank, Account, Currency, Payment Method, Layout and Holiday Processing Options from Payables options of Remit Supplier Location to the new payment schedule issued when the user selects a payment action of Void or Stop with cancel action of Re-Open Voucher(s)/Re-Issue.	FSCM 9.2 Update Image 055 (9.2.055).
Program Management	As of FSCM Update Image 55, Program Management no longer supports integration with Primavera.	FSCM 9.2 Update Image 055 (9.2.055).
Project Costing	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Project Costing	As of FSCM Update Image 54, Project Costing modified the default setting in Application Designer for various pushbuttons and hyperlinks to be Enabled when the page is read-only for the user. This impacts these components in Project Costing. Define Project General Info, Manage Project Team, Define Project Activities, Budget Plan, Budget Detail, Review Commitment Control, Funds Distribution, My Projects, Project Request	FSCM 9.2 Update Image 054 (9.2.054).
Project Costing	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Project Costing	As of FSCM Update Image 55, Project Costing no longer supports integration with Primavera.	FSCM 9.2 Update Image 055 (9.2.055).
Project Costing	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Project Costing delivers the Project Request tile in the Continue With section. This tile allows you to complete Project Requests that have been started but not yet submitted.	FSCM 9.2 Update Image 055 (9.2.055).
Project Costing	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_PC_PROJ_GENERAL search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Project Costing	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_PC_PROJ_REQUEST_FL search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Receivables	Enhanced the build search index process for Receivables by allowing you to run the index by data partition. This optional method allows data to be processed in chunks using single or multiple run controls to index data more efficiently.	FSCM 9.2 Update Image 054 (9.2.054).
Receivables	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).

Receivables	Enhanced the Fluid Receivables WorkCenter by adopting the Enterprise Components Work Management Framework. This framework allows you to view and manage transactions when they appear in the My Work section of the Receivables WorkCenter. This optional framework provides additional actions, in addition to existing application-delivered actions, to track and clear transactions when no system-based resolution exists. The transactions are placed into one of five different views: Unassigned, All Assigned, All History, Assigned to Me, and Inactive.	FSCM 9.2 Update Image 054 (9.2.054).
Receivables	Enhanced the spreadsheet payment and direct journal upload process when generating log files. Log files are now written to the same workbook file in a new tab called Import Logs. The Import Logs tab displays the status and log message.	FSCM 9.2 Update Image 054 (9.2.054).
Receivables	Enhanced credit card encryption by allowing you to select from multiple encryption algorithms, which are initially loaded using the Encryption Profile page in PeopleTools. The FSCM Manage Credit Card Encryption page is modified to select a new encryption profile from your list, which updates the algorithm for all FSCM records.	FSCM 9.2 Update Image 054 (9.2.054).
Receivables	Added option to allow users to modify attachments of the posted payments.	FSCM 9.2 Update Image 055 (9.2.055).
Receivables	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Receivables delivers the Items in Dispute tile in the Suggestions section.	FSCM 9.2 Update Image 055 (9.2.055).
Receivables	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Receivables delivers the Deposits Not Posted tile in the Continue With section.	FSCM 9.2 Update Image 055 (9.2.055).
Receivables	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Receivables delivers a Billing and Receivables section, where you can select tiles to access transaction pages.	FSCM 9.2 Update Image 055 (9.2.055).
Receivables	Added a warning message to indicate rounding account code is required for processing multi-currency transactions.	FSCM 9.2 Update Image 055 (9.2.055).
Receivables	Added option to display a message in Maintenance Worksheet for missing supplier/AP integration setup during refund transactions.	FSCM 9.2 Update Image 055 (9.2.055).
Receivables	Enhanced excel upload template for direct journal accounting entries by including Entry Event, ChartField Security, Accounting Tag and SpeedType Key.	FSCM 9.2 Update Image 055 (9.2.055).
Receivables	Enhanced e-invoicing for France by generating output XML files in CDAR format from AR.	FSCM 9.2 Update Image 055 (9.2.055).
Receivables	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_AR_ITEMS, EP_AR_ITEM_ACT_COLL_KIB, EP_AR_PAYMENTS and EP_AR_PMT_ENTRY search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
Receivables	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_AR_ITEMS, EP_AR_ITEM_ACT_COLL_KIB, EP_AR_PAYMENTS and EP_AR_PMT_ENTRY search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
Receivables	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_AR_ITEMS, EP_AR_ITEM_ACT_COLL_KIB, EP_AR_PAYMENTS and EP_AR_PMT_ENTRY search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
Receivables	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_AR_ITEMS, EP_AR_ITEM_ACT_COLL_KIB, EP_AR_PAYMENTS and EP_AR_PMT_ENTRY search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
Resource Management	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Resource Management	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_RS_SERVICE_ORDER_CMP and EP_RS_ASSIGNMENT_CMP search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
Staffing Front Office	As of FSCM Update Image 55, Staffing Front Office no longer supports Job Board integration and Resume Parsing services.	FSCM 9.2 Update Image 055 (9.2.055).
Treasury	Enhanced the Fluid Treasury WorkCenter by adopting the Enterprise Components Work Management Framework. This framework allows you to view and manage transactions when they appear in the My Work section of the Treasury WorkCenter. This optional framework provides additional actions, in addition to existing application-delivered actions, to track and clear transactions when no system-based resolution exists. The transactions are placed into one of five different views: Unassigned, All Assigned, All History, Assigned to Me, and Inactive.	FSCM 9.2 Update Image 054 (9.2.054).
Treasury	Added support for the new camt.053.001.08 format bank statements.	FSCM 9.2 Update Image 055 (9.2.055).

Inventory	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Inventory	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_IN_BU_ITEM search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Inventory	Added Par Location and Par Location Activity insights dashboards in Inventory to provide users with enhanced visibility and analytical insights into par locations, item counts, and inventory activity across business units. These dashboards help to monitor replenishment status, stock levels, and resource allocation for more effective PAR Items management.	FSCM 9.2 Update Image 055 (9.2.055).
Mobile Inventory Management	Enhanced mobile inventory receiving with a warning message indicating 'ASN Exists' when an Advance Shipping Notice (ASN) is present for an item. This warning helps users recognize that an item is scheduled for receipt via ASN, preventing manual receipt entry when an ASN is already in place.	FSCM 9.2 Update Image 054 (9.2.054).
Order Management	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Order Management	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_OM_CUSTOMER search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Purchasing	Added the Fluid Procurement WorkCenter, allowing users to efficiently access the most frequently used Procurement components. This WorCenter includes grouplets for My Work, Links, Queries, Reports & Processes, My Approvals, and My Insights.	FSCM 9.2 Update Image 054 (9.2.054).
Purchasing	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Purchasing	Enhanced credit card encryption by allowing you to select from multiple encryption algorithms, which are initially loaded using the Encryption Profile page in PeopleTools. The FSCM Manage Credit Card Encryption page is modified to select a new encryption profile from your list, which updates the algorithm for all FSCM records.	FSCM 9.2 Update Image 054 (9.2.054).
Purchasing	Enhanced supplier or bidder registration process to allow users to define whether the supplier or bidder is a payment card provider or accepts payment card.	FSCM 9.2 Update Image 054 (9.2.054).
Purchasing	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_PO_PURCHASE_ORDERS search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Purchasing	Enhanced the Supplier Performance analytic on the Supplier Watch List page to utilize the PeopleTools Dynamic Charting capability provided in 8.62.	FSCM 9.2 Update Image 055 (9.2.055).
Purchasing	Adopted the PeopleTools 8.60 stylesheet and color changes within Supplier Scorecarding.	FSCM 9.2 Update Image 055 (9.2.055).
Purchasing	Enhanced the Procurement WorkCenter to add PO Dispatch Errors exception under My Work. Users can now easily access and manage purchase orders with dispatch errors, improving visibility and enabling faster resolution of dispatch-related issues.	FSCM 9.2 Update Image 055 (9.2.055).
Purchasing	Enhanced the Procurement WorkCenter to add Denied POs exception under My Work. Users can now quickly view and resolve denied purchase orders, making it easier to address issues and maintain efficient order processing.	FSCM 9.2 Update Image 055 (9.2.055).
Purchasing	Enhanced the Procurement Card Transaction to provide a configurable, approval workflow for procurement card. Users can now submit transactions for approval directly from the reconciliation page and track their approval status using their organization-defined approval process.	FSCM 9.2 Update Image 055 (9.2.055).
Purchasing	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_PO_RECEIPTS search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Purchasing	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_PO_INS search definition.	FSCM 9.2 Update Image 055 (9.2.055).

Purchasing	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_PO_CONTRACT_KIB search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Purchasing	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_PO_CONTRACTS search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Purchasing	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_PO_RECEIPTS_KIB search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Strategic Sourcing	Enhanced Strategic Sourcing Bidder-to-Supplier conversion process to transfer 'Payment Card Provider' and 'Accepts Payment Card' information entered during bidder registration to the supplier master. Also, the Awarding Events process is enhanced so that when posting an award and creating a supplier ID, the same payment card information is transferred to the supplier master.	FSCM 9.2 Update Image 054 (9.2.054).
Strategic Sourcing	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Strategic Sourcing	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_SS_EVENTS search definition.	FSCM 9.2 Update Image 055 (9.2.055).
Strategic Sourcing	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. Strategic Sourcing delivers the Pending Bidder Responses tile in the Continue With section. This tile allows you to access the View All Continue With page, which displays Save For Later transactions for bidder responses. You can dismiss the transaction or access the Event Details page, where you can edit and submit the bid.	FSCM 9.2 Update Image 055 (9.2.055).
Supplier Contract Management	Enhanced Bank Setup and Processing to use alphanumeric account numbers for Australian Banks.	FSCM 9.2 Update Image 054 (9.2.054).
Supplier Contract Management	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).
Supplier Contract Management	Enhanced Supplier Contract Management by adding Insights Dashboard that will highlight documents needing attention, compliance with service level agreements, and monitoring of pending action items and potential bottlenecks in the document approval process. This information will help users identify areas of concern and take the necessary action.	FSCM 9.2 Update Image 054 (9.2.054).
Supplier Contract Management	Replaced the use of Bouncy Castle libraries with standard Java libraries. Bouncy Castle libraries are no longer supported as of PeopleSoft FSCM Update Image 54 and PeopleTools 8.62.	FSCM 9.2 Update Image 054 (9.2.054).
Supplier Contract Management	Enhanced Supplier Contracts Management by providing the DocuSign notifications to alert signatories that a document is pending their signature.	FSCM 9.2 Update Image 055 (9.2.055).
Supplier Contract Management	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_CS_DOC_ADHOC, EP_CS_DOC_CONTRACTS, EP_CS_DOC_PURCHORDRS, EP_CS_DOC_SOURCING, EP_CS_CLAUSES, and EP_CS_SECTIONS search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
Supplier Relationship Management	Enhanced Supplier Relationship Management, by adopting the PeopleTools Excel-to-Component Interface Utility feature in Supplier Classification Tracking, allowing organizations to bulk upload and maintain classification information using an Excel file.	FSCM 9.2 Update Image 054 (9.2.054).
Supplier Relationship Management	Enhanced Supplier Master Contacts, Define Supplier, Supplier Users, Review Supplier, and Grants Sub-recipients General Info by providing customers with visibility of users or contacts. Also, enhanced Supplier Registration by providing the flexibility of having the user profile info as optional for non-primary contact.	FSCM 9.2 Update Image 054 (9.2.054).
eProcurement	Enhanced the Build Index - Incremental process by adding code to some FSCM application-specific queries to detect new effective dated rows and changes to setup tables, such as company name updates. It is important to reload and save all RTI configurations to reflect changes made to parent queries. This feature ensures more accurate and up-to-date search results without requiring a full index rebuild and lays the groundwork for the Automated Incremental Indexing feature, which automates the detection of these changes and triggers incremental builds via a scheduled tools process in an upcoming image.	FSCM 9.2 Update Image 054 (9.2.054).

eProcurement	Enhanced the Build Search Index process for eProcurement by allowing you to run the Tools 'index by data partition' option for the EP_PO_REQUISITIONS search definition. This optional method allows data to be processed in chunks using one or more run controls to index the data more efficiently. This option requires Tools 8.62.	FSCM 9.2 Update Image 054 (9.2.054).
eProcurement	Enhanced eProcurement Fluid Create Requisition to allow the users to search and view external supplier catalogs on the Catalog Search Results page. The ePro Administrator can import these catalogs via Oracle Business Network (OBN) or through the Import External Catalog option on the Maintain External Catalogs page.	FSCM 9.2 Update Image 054 (9.2.054).
eProcurement	Enhanced the Procurement WorkCenter to add multiple requisition-related exceptions under My Work. Users can now quickly access and manage these requisition exceptions, improving visibility and enabling faster resolution of outstanding issues.	FSCM 9.2 Update Image 055 (9.2.055).
eProcurement	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_PO_REQUISITIONS, EP_PO_POA, EP_PV_MASTERITEM_SD, and EP_PV_MASTERITEMVENDOR_SD search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
eProcurement	Adopted the PeopleTools 8.62 Automated Incremental Indexing feature for the EP_PO_REQUISITIONS, EP_PO_POA, EP_PV_MASTERITEM_SD, and EP_PV_MASTERITEMVENDOR_SD search definitions.	FSCM 9.2 Update Image 055 (9.2.055).
eProcurement	Adopted the Sectionalized homepage feature, which is introduced in PeopleTools 8.62. eProcurement delivers the Items in Cart tile in the Suggestions section. This tile allows you to access the Create Requisition page, which displays the persistent cart. eProcurement also delivers the Requisitions Saved but not Submitted tile in the Continue With section. This tile allows you to complete requisitions that have been started but not yet submitted.	FSCM 9.2 Update Image 055 (9.2.055).
